

**THE PROGERIA RESEARCH FOUNDATION  
INTERNATIONAL PROGERIA REGISTRY**

Hutchinson-Gilford Progeria Syndrome (Progeria) is a very rare condition. This International Registry has been established to provide services and information to families of children with Progeria, treating physicians, and researchers, and to better understand the nature and natural course of Progeria. This serves to improve communication of ideas among interested researchers, and assures rapid distribution of any new information that may benefit patients and/or their families. Your cooperation in registering and in helping to contribute information on Progeria individuals to the Registry is greatly appreciated.

**PRF considers confidentiality a high priority. The personal identifying information you submit on these forms will not be distributed in any way without explicit consent from the Progeria subject or their parent or guardian.**

You may email the completed forms to [info@progeriaresearch.org](mailto:info@progeriaresearch.org) or  
Return completed forms directly to Registry Headquarters:

The Progeria Research Foundation, Inc.  
PO Box 3453  
Peabody, MA
