

Megan wants to be like **every other little girl.**

But Megan is not like most other little girls because she has a disease called **Progeria**.

Progeria is a rapid aging disease that causes **children to die** by their early teens from heart disease or stroke.

The Progeria Research Foundation is working to cure this devastating disease. You can help save Megan and children like her.

Learn more about Progeria research and how you can make a difference at **PROGERIARESEARCH.ORG**.
