

Hats ON

for Progeria

Want an excuse to wear your favorite hat for the day?

Now you have one!

The Progeria Research Foundation wants you to put your Hats ON for Progeria! Funds raised will power breakthrough research toward the cure.

Progeria is an ultra-rare, fatal, “rapid-aging” disease. Without treatment, children with Progeria die of heart attacks and strokes usually in their teens. The Progeria Research Foundation has found a treatment, and next, we’re looking for the CURE!

Hats ON for Progeria Day!
