

# 2024 DONOR IMPACT REPORT

**18** children and young adults from **11** countries travelled to Boston for PRF-funded clinical trials

**26** new children from **15** countries joined PRF's registry - one of our highest years ever!

**2** thriving drug development programs that could lead to the cure: RNA and DNA Gene Therapies

**1** new clinical trial launched with the drug progerinin

**98** PRF Cell Bank samples sent to **24** researchers in **7** countries for lifesaving research

**30%** increase in Progeria families joining PRF's online community, Progeria Connect

Thanks to your support, progress in 2024 brought us ever closer to better treatments and the CURE!

## How did we get here?

YOU, our generous donors; the courageous FAMILIES we serve; the talented LEADERS of PRF; our first-rate hospital, researcher, and company PARTNERS; and our mission-focused PROGRAMS.

## The Result?

Those with Progeria are living longer & healthier lives, and the remarkable pace of progress toward the cure continues.

## What's next?

PRF is laser-focused on advancing the most promising treatments to extend the children's lives, including drugs like lonafarnib, progerinin, and RNA therapies. At the same time, we are working to manufacture a DNA gene therapy and to bring this one-time treatment to human clinical trials. This innovative therapy has the potential to be the CURE.

**With your continued support, what once was a distant goal – a CURE for Progeria – is now within our sights!**

### 2024 Expense Summary\*

83%

Programs

17%
