PRF By The Numbers: A Data Sharing Tool

➤ PRF By The Numbers is a **data sharing tool** originating from The Progeria Research Foundation's programs and services.

➤ We translate information collected within our programs and services, and develop charts and graphs which track our progress from year to year.

➤ This allows you to assess where we've been, and the improvements we've made for children with Progeria.

Why Sharing Data Is Essential

➤ According to the National Institutes of Health:

"data sharing is essential for expedited translation of research results into knowledge, products, and procedures to improve human health."

http://grants.nih.gov/grants/guide/notice-files/NOT-OD-03-032.html

➤ In other words, everyone benefits by knowing and learning as much as possible about Progeria - the scientific and medical communities, the public, and the children.

PRF By The Numbers...Here's How It Works

➤ We take raw data collected through our programs and services, remove any personal information to protect the participant, and present it to you in a format that is engaging and informative.

> PRF programs and services include:

The PRF International Registry

The PRF Diagnostics Program

The PRF Cell & Tissue Bank

The PRF Medical & Research Database

PRF Research Grants

Scientific Workshops

Clinical Trial Funding and Participation

Progeria Connect

Our Target Audience

> PRF By The Numbers is intended for a broad array of users

Families and children with Progeria

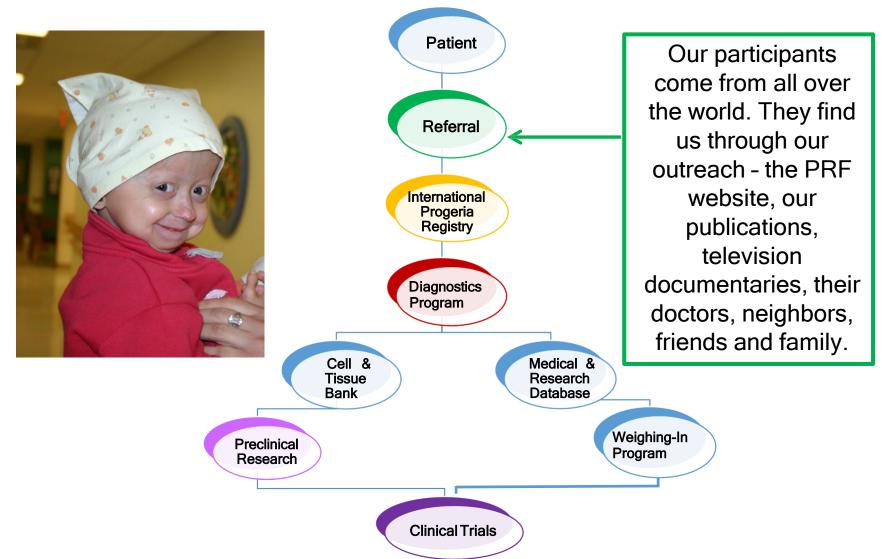

- ➤ This means that different types of slides will be of interest depending on who is looking at the information. We have designed this slide set so that you can pull out what is most important to you.
- ➤ We love suggestions if you don't see some facts and figures here that you think would be informative, please let us know at

info@progeriaresearch.org

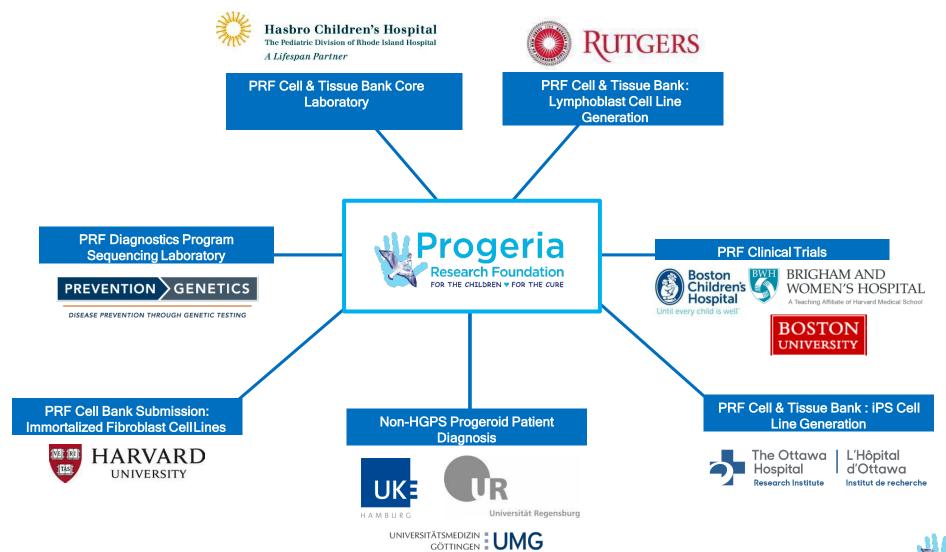

PRF Programs: It All Starts With The Children

Program Collaborations for Success

Institut für Humangenetik

Our Program Collaborators

Our collaborating institutions are crucial to our ability to help children with Progeria. We are extremely grateful for these ongoing partnerships:

Hasbro Children's Hospital Location of The PRF Cell & Tissue Bank Program IRB approval

PreventionGenetics CLIA*-approved genetic sequence testing

Ottawa Hospital Research Institute Induced Pluripotent Stem Cell (iPSC) CLIA*-approved generation and distribution

Our Clinical Trial Collaborators

Our collaborating institutions are crucial to our ability to help children with Progeria

Harvard University - Associated Hospitals:

Boston Children's Hospital
Brigham and Women's Hospital
Dana Farber Cancer Institute

NIH - funded Clinical and Translational Study Unit at Boston Children's Hospital Sentynl Therapeutics, Inc.

Number of Living PRF-Identified Cases

September 30, 2025

Total Number of Children with HGPS* and PLs** Worldwide:

210

HGPS* Worldwide:

153

HGPS* in the United States:

17

Progeroid Laminopathies** Worldwide:

57

Progeroid Laminopathies** in the United States:

^{*}Children in the HGPS category have a progerin-producing mutation in the LMNA gene

^{**}Those in the Progeroid Laminopathy category have a mutation in the lamin pathway but don't produce progerin

^{**}Cases of PL do not include those identified solely from published scientific journal articles

Living PRF-Identified Cases Reside In 51 Countries Today

Afghanistan Algeria Argentina Australia Bangladesh Belgium Brazil Canada China Colombia Czech Republic Denmark Egypt Ethiopia France Germany Greece Guyana India Indonesia Iran Iraq Ireland Israel Italy Japan

Kazakhstan Libya Luxembourg Malaysia Mexico Netherlands New Zealand Oman Pakistan Palestine-Gaza Papua New Guinea Peru **Philippines** Portugal Russia Serbia South Korea Spain Sweden **Tajikistan** Turkev Ukraine **United Kingdom** USA Vietnam

Every Year Our Numbers Grow

Living Children and Adults PRF has identified with Progeria and the countries they reside in from 2000 - 2011

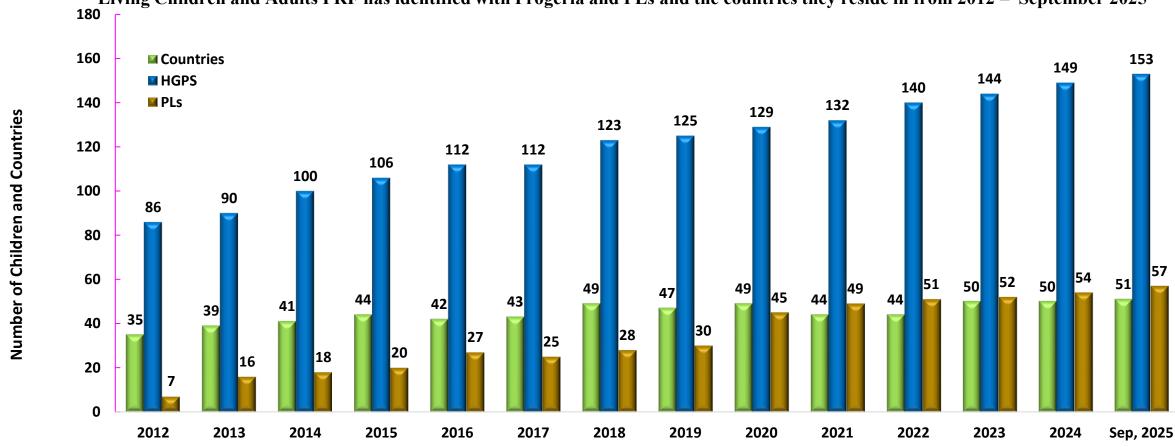

^{*} When a child passes away, numbers are decreased

Every Year Our Numbers Grow

Living Children and Adults PRF has identified with Progeria and PLs and the countries they reside in from 2012 – September 2025*

Year

^{*} Cases of PL do not include those identified solely from published scientific journal article

^{*} When a child passes away, numbers are decreased

Tracking Children with Progeria Through Prevalence

➤ How does PRF estimate how many children we are searching for, and in what countries? We use *population prevalence*.

➤ Prevalence is the proportion of children with Progeria per total population.

How Prevalence Is Estimated

- ➤ At PRF, we use a formula based on the number of children we've identified in the US. We then expand that out to the world population.
- We do this because we have the most complete reporting for the US and since Progeria has no gender, ethnic, or other biases, we assume that the prevalence in the US is the same prevalence in other countries.
- > PRF calculates prevalence for the US based on *Worldometer* population estimates.

USA Prevalence of Progeria

September 23, 2025 population statistics:

The US population is:

347,704,882 people

Number of PRF-identified children with HGPS over the last 3 year

Average prevalence of HGPS in the US: 16 in 347 million is about

1 in 20 million people

^{*}estimates routinely fall between 1 in 16 - 1 in 20 million people.

Prevalence and World Population of Progeria

Given the world population on September 23, 2025

There are between 412 and 515 children living with Progeria worldwide

PRF strives to find every child with Progeria because in order to help every child, we must find every child

Using Prevalence To Find Children

We can now use the total population estimates for any given country, in order to understand whether we have found most or all children in a particular country.

➤ For example, as of September 23, 2025:

Brazil's population was estimated as

213,001,076 people

Using Prevalence, the number of children living with Progeria in Brazil is 213,001,076/20,000,000 =

PRF has identified 9 of these 11 children, and is searching for the 2 others

* Data based on the latest Worldometers estimates

International Progeria Registry*

Program Goals:

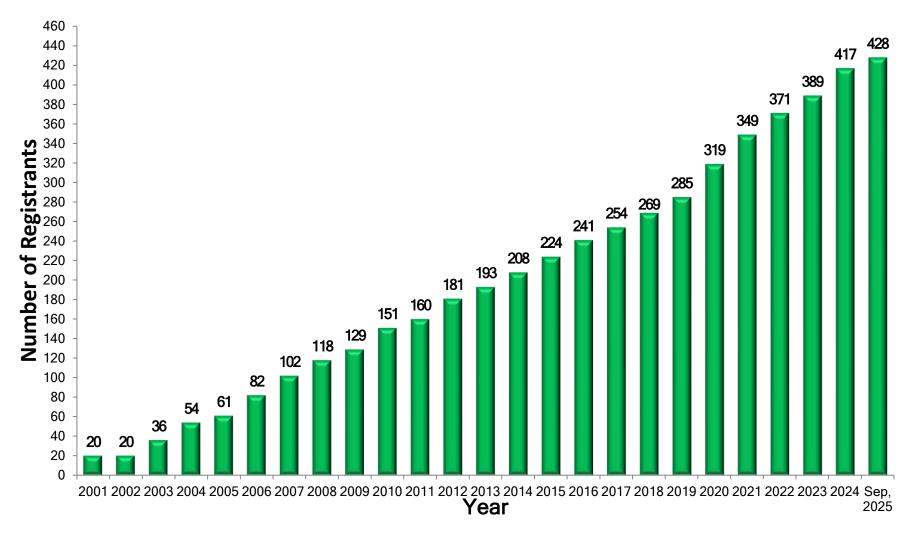

- ➤ Patient identification
- ➤ Outreach to patient families and their physicians
- > A springboard for program enrollment

Registry forms available at

https://www.progeriaresearch.org/international-registry-2/

*PRF International Registry includes those with genetically confirmed or clinically suspected Progeria, as well as those with ZMPSTE24 and other possible progeroid syndromes

425 Children and Adults Have Been Registered With PRF

From 75 Countries and 1 Territory

Algeria, Argentina Australia. Bangladesh Belgium, Bolivia Brazil, Bulgaria Canada, Chile China, Colombia Czech Republic Denmark Dominican Republic Ecuador, Egypt England, Ethiopia Finland, France Germany, Greece, Guatemala Guyana, **Honduras** Hong Kong, India Indonesia, Iran, Iraq Ireland, Israel Italy, Japan Kazakhstan Kyrgyzstan, Libya Luxembourg, Malaysia Mexico, Morocco

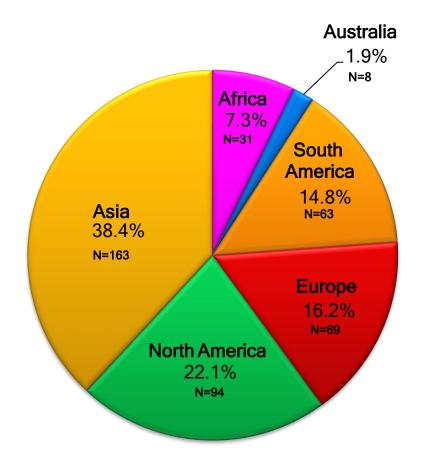

Nepal, Netherlands New Zealand, Nigeria Oman, Pakistan **Palestine** Papua New Guinea Panama Peru, Philippines Poland, Portugal Puerto Rico Romania, Russia Saudi Arabia Serbia. South Africa South Korea Spain, Sri Lanka Suriname, Sweden Switzerland, Tanzania Thailand, Togo Turkey, Ukraine USA, Uzbekistan, Venezuela Vietnam

...And All Continents

Participation (%) By Continent

PRF Diagnostics Program

Program Goal:

Genetic Sequence Testing for Progeria-causing mutations

Pre-requisites for Testing:

Registration with PRF International Registry

♦ One or more of the following

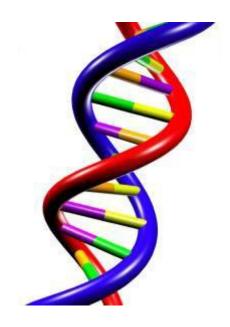

Family history - proband, prenatal

Phenotypic presentation - proband, postnatal

Relative of positive proband

Testing information available at:

https://www.progeriaresearch.org/the-prf-diagnostic-testing-program/

Diagnostics Testing Summary

September 18, 2025

Total Number of Proband Tests Performed:

172

Exon 11 (HGPS) Mutations:

Other Progeroid Laminopathies (Exons 1 - 12):

ZMPSTE24 Mutations:

Average Number of Patients Tested Per Year:

All tests are performed in a Clinical Laboratory Improvement Amendments (CLIA) certified facility.

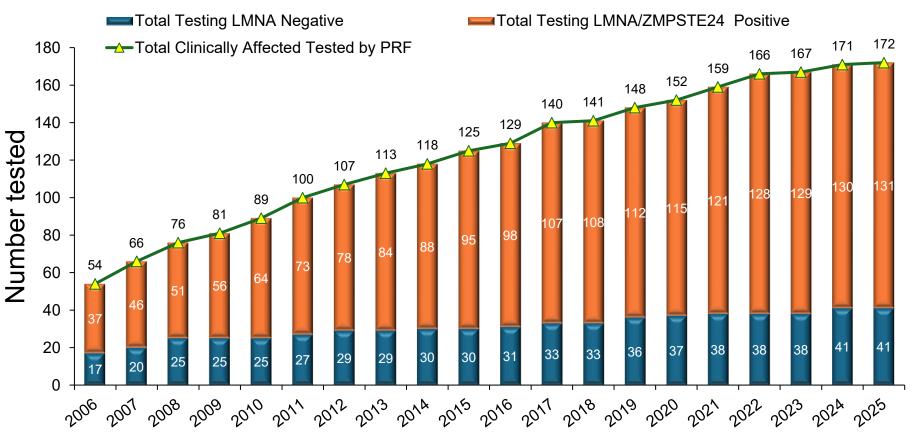

Mutations Identified Through PRF Diagnostics Program

DNA Mutation	Amino Acid Effect	Zygosity	Progerin Producing?	Number Diagnosed				
Classic HGPS – LMNA Mutation								
1824 C>T, exon 11	G608G	heterozygous	Yes	104				
Non-Classic HGPS— LMNA Mutation								
1821 G>A, exon 11	V607V	heterozygous	Yes	2				
1822 G>A, exon 11	G608S	heterozygous	Yes	3

	Progeroid Lamino	pathy- LMNA Mutation						
331 G>A, exon 1	E111K	heterozygous	No	1				
1579 C>T, exon 9	R527C	heterozygous	No	3				
1579 C>T, exon 9	R527C	homozygous	No	6				
1580 G>T, exon 9	R527L	homozygous	No	2				
1619 T>C, exon 10	M540T	Heterozygous	No	2				
1619 T>C, exon 10	M540T	homozygous	No	3				
1868 C>G, exon 11	T623S	heterozygous	Yes	1				
Progeroid Laminopathy— ZMPSTE24 Mutation								
1274 T>C, exon 10	L425P	heterozygous	No	2				
1274 T>C, exon 10	L425P	homozygous	No	2				

Longitudinal Testing Data for PRF Diagnostics Program

Number of Affected Children/Adults Tested and the Number Testing Positive for *LMNA* Gene Mutation

PRF Cell & Tissue Bank

Program Goals:

- ➤ Provide a resource for researchers worldwide
- ➤ Ensure the sufficient availability of genetic and biological materials essential for research aimed at understanding the pathophysiology of disease and the links between Progeria, aging and heart disease
- ➤ Obtain long-term clinical data

Resource information available at: https://www.progeriaresearch.org/cell-and-tissue-bank/

PRF Cell and Tissue Bank Holdings

As of September 18, 2025

Total Number of Participants:

- 71 Dermal Fibroblast Lines from 47 affected and 24 parents
- 6 Immortalized Fibroblast Cell Lines from 1 affected and 5 parents
- Lymphoblast Lines from 71 affected, 46 parents and 8 siblings
- 9 Induced Pluripotent Stem Cell Lines from 5 affected and 4 parents

Mutations Available in PRF Cell & Tissue Bank

PRF Cell & Tissue Bank Distribution

As of September 18, 2025:

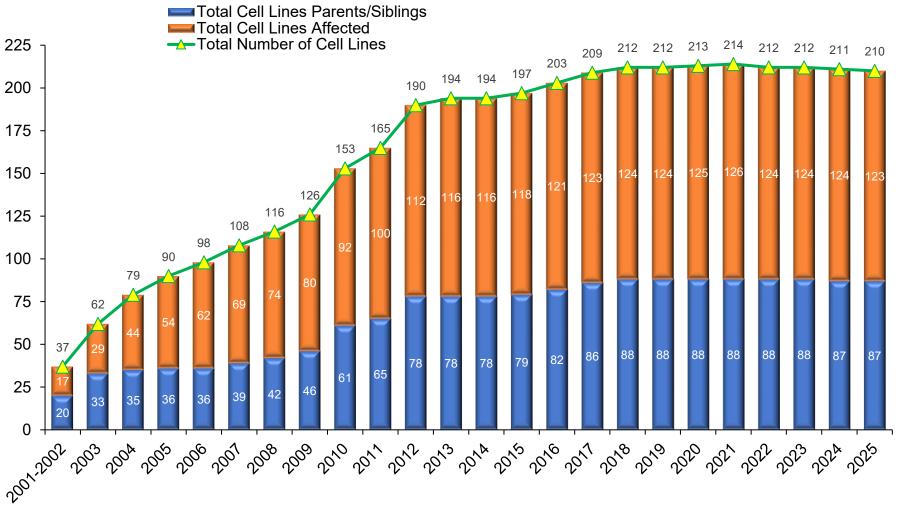

- 1688 Cell Lines
 - **207** DNA Samples
- 505 Tissue, plasma, serum and other biological samples
 - 37 Lonafarnib Samples

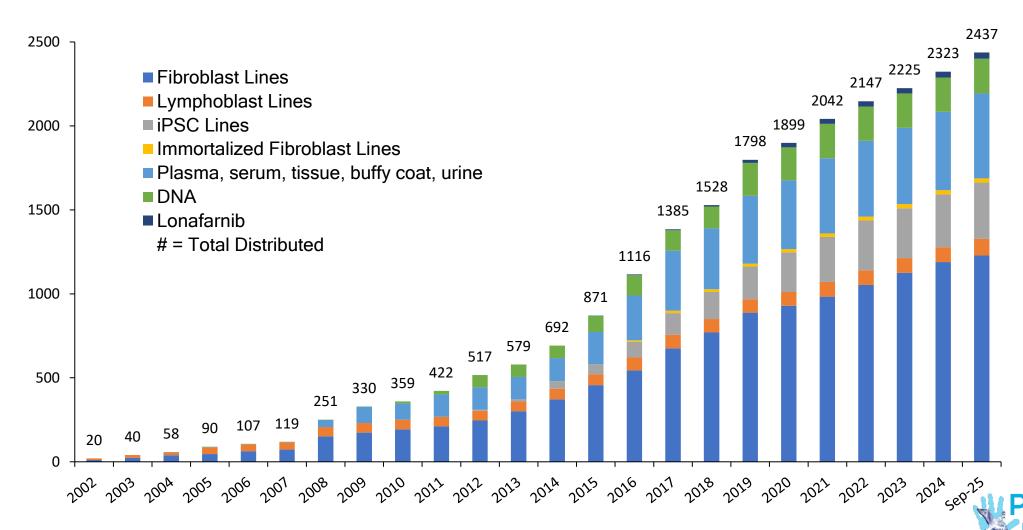

Senescent Progeria Fibroblasts in Culture

Number Of Cell Lines By Year

Cumulative Number of Biological Samples Distributed

Cell and Tissue Bank Recipients

Cells and biological material have been distributed to **257** laboratories in **29** countries

Complete list of researchers available at: https://www.progeriaresearch.org/cell-and-tissue-bank-recipients

PRF Medical & Research Database

Program Goals:

Collect the patient health records for living and deceased children with Progeria

➤ Obtain long-term clinical data

➤ Abstract data for longitudinal and crosssectional analyses

➤ Better understand the clinical disease process in Progeria and aging related diseases

➤ Develop treatment strategies and recommendations for health care professionals and families

How The PRF Medical & Research Database Works

- Project staff obtain the patient's medical records and film studies from birth throughout the participant's lifespan.
- Medical records include visits to: primary care physicians, specialty physicians, hospital emergency rooms, hospital admissions, dentists, physical therapy, occupational therapy and school health records.
- Retrospective data abstraction protocol allows for specifically targeted or broad spectrum of data.

Enrollment information available at: https://www.progeriaresearch.org/medical-database/

Medical & Research Database Participation

223

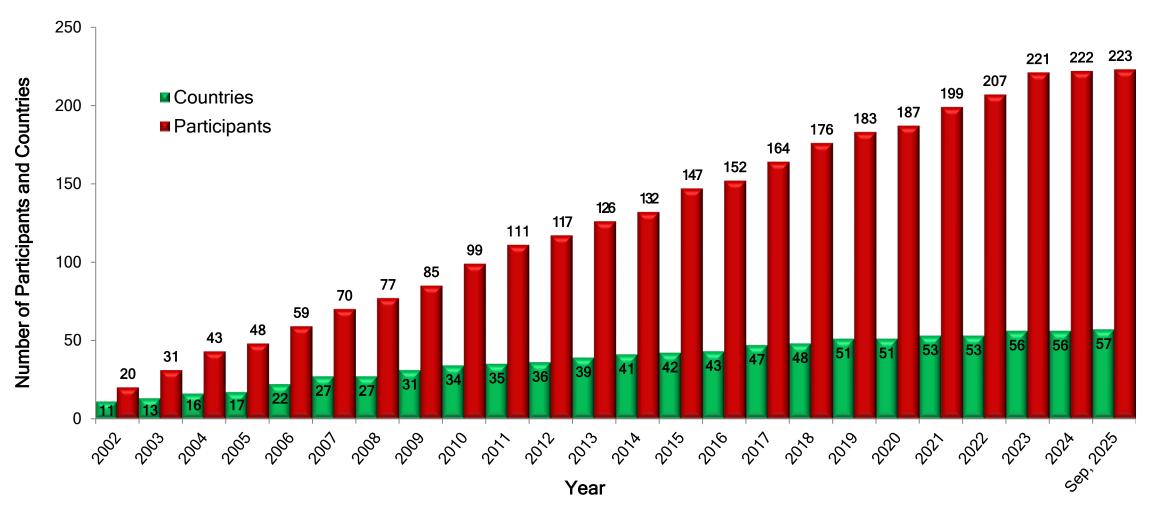

Participants are enrolled from 57 countries and 1 US territory

Algeria Argentina Australia Bangladesh Belgium Brazil Canada, Chile China, Columbia Denmark Dominica Republic Egypt, England, Ethiopia France, Germany Guatemala, Guyana Honduras, India Indonesia, Ireland Israel, Italy Japan, Kazakhstan

Participants Enrolled In The PRF Weighing-In Program and Countries of Residence

Clinical Trials And The Weighing-In Program

- ➤ Data from this program were key in the development of primary outcome measure for the first drug treatment trial for Progeria.
- ➤ As of December 1, 2018, 90 children from The PRF Weighing-In Program have entered clinical treatment trials using this data.

Failure to Thrive Starts Towards End of Year One

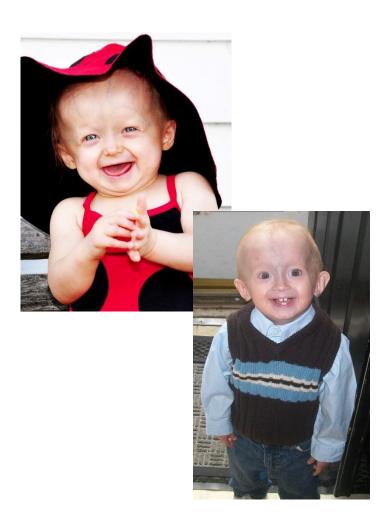

PRF-Funded Clinical Treatment Trials

Clinical Drug Treatment Trials

Goals:

- ➤ To define the natural history of HGPS in quantifiable terms that will expand our ability to measure treatment outcome
- ➤ To assess the safety of new treatments for HGPS
- ➤ To measure effects of treatments for children with HGPS on disease status, changes in health, and survival

Participation in PRF Clinical Trials

109

Children have participated in PRF Clinical Trials from 42 countries

Argentina Australia Belgium, Brazil Canada, China Colombia Denmark Dominican Republic Egypt **England** Germany Guyana **Honduras** India, Israel Italy, Japan Kazakhstan Libya

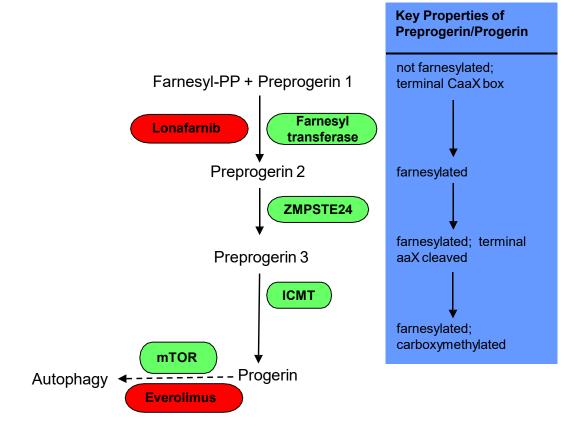

Mexico

Morocco, Pakistan Peru, Philippines Poland, Portugal Romania Russia, Serbia South Africa South Korea Spain, Sri Lanka Suriname Sweden **Tanzania** Togo Turkey Ukraine USA Venezuela

Current Therapeutic Intervention Strategies

Post-translational processing and medications currently under investigation in clinical treatment trials for Progeria. Items in green = enzymes. Items in red = clinical trial medications that inhibit corresponding enzymes. Lonafarnib is a farnesyltransferase inhibitor. Everolimus is a rapamycin analogue that inhibits mTOR and promotes cellular autophagy. FT=farnesyltransferase.

PRF-Funded Clinical Treatment Trials

Children & young adults have flown from all over the world to participate in clinical treatment trials 1-5 at the Boston Children's Hospital

Clinical Treatment Trial Efficacy Results

Lonafarnib, a type of farnesyltransferase inhibitor (FTI) is our first treatment for Progeria

> Results showed improvement in:

Rate of weight gain

Increased vascular distensibility

Improved bone structure

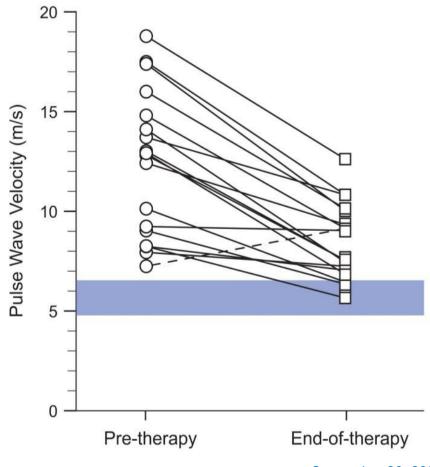

Better neurosensory hearing

Increased Lifespan

Gordon et al, PNAS, 2011

Positive Effects of Lonafarnib (Zokinvy) on Progeria: Results of PRF's Clinical Treatment Trials

Average increased lifespan of 4.3 years

Increased vascular distensibility

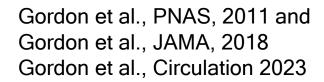

Improved bone structure

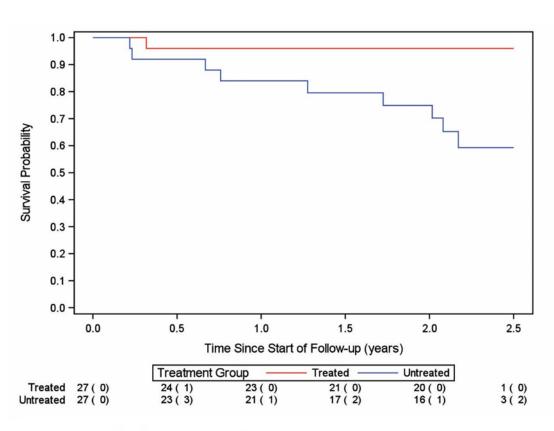

Better neurosensory hearing

Modest increase in rate of weight gain

JAMA | Preliminary Communication

Association of Lonafarnib Treatment vs No Treatment With Mortality Rate in Patients With Hutchinson-Gilford Progeria Syndrome

Leslie B. Gordon, MD, PhD; Heather Shappell, PhD; Joe Massaro, PhD; Ralph B. D'Agostino Sr, PhD; Joan Brazier, MS; Susan E. Campbell, MA; Monica E. Kleinman, MD; Mark W. Kleran, MD, PhD

3 Ways to Access Lonafarnib (Zokinvy)

Zokinvy (lonafarnib) is an FDA approved drug in the US. It is the current standard of care for those with Progeria. It is available through

- Prescription in the US and in select non-US countries
- PRF's clinical treatment trials
- 3. The manufacturer's (Sentynl) Managed Access Program in select non-US countries

We are far from finished!

We must forge ahead with increased intensity and collaborative efforts to find additional treatments, and the cure!

Please contact PRF at info@progeriaresearch.org for more information on how to access Zokinvy (lonafarnib) for your child or patient with Progeria

Treatment Trial Collaborations For Success

> The children are seen by physicians from:

Boston Children's Hospital

Dana-Farber Cancer Institute

Brigham and Women's Hospital

Data were also generated by scientists from:

Progerin as a Biomarker for Progeria

Progerin is the toxic protein produced by cells with progeria in place of the normal lamin A protein

Normal lamin A plays a role in cell division, but the toxic progerin gets stuck to the nuclear membrane of cells, and its accumulation causes progeria

A biomarker is "a biological molecule found in blood, other body fluids, or tissues that is a sign of a normal or abnormal process, or of a condition or disease" (National Cancer Institute)

Treatments for progeria aim to decrease the amount of progerin produced by the body.

ORIGINAL RESEARCH ARTICLE

Plasma Progerin in Patients With Hutchinson-Gilford Progeria Syndrome: Immunoassay Development and Clinical Evaluation

Leslie B. Gordon, MD, PhD; Wendy Norris, MS; Sarah Hamren, BS; Robert Goodson, BS; Jessica LeClair, PhD; Joseph Massaro, PhD; Asya Lyass, PhD; Ralph B. D'AgostinoSr, PhD; Kelsey Tuminelli, MS; Mark W. Kieran, MD, PhD; Monica E. Kleinman, MD

Dr. Gordon et al. 2023 developed an assay to measure progerin in blood plasma

Further Findings of the Progerin Biomarker Study

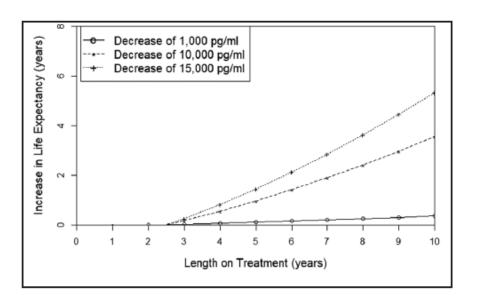

Plasma progerin levels were 95x higher in those with progeria than in the average healthy human

Treatment with lonafarnib decreased progerin levels by 35-62% on average

Lifespan increase was shown to be linked to decreased progerin levels and longer time on treatment

Long-term treatment with lonafarnib (10+ years) resulted in a lifespan increase of about 35%

PRF Grant Funding

As of September 30, 2025:

- > Since inception 281 grant application received and 85 funded
- > PRF has funded 69 principal investigators from 55 institutions in 14 countries

Lamina A, progerin, Lamin B in HGPS and aging

Genetics and nuclear function

Preclinical Drug Therapy

Molecular Abnormalities and Therapies

Vascular Pathology

Mouse Models

Stem Cell Investigations and Therapy

Clinical Trials

PRF Grantees

PRF has funded **69** principal investigators from **55** institutions in **14** countries Complete list of Grantees available at: https://www.progeriaresearch.org/grants-funded/

PRF Scientific Meetings

Meeting Goals:

➤ To promote collaboration between basic and clinical scientists toward progress in Progeria, cardiovascular, and aging research PRF has held international scientific meetings.

International Workshops Promoting Global Interest In Progeria, Cardiovascular Disease And Aging

- These are large multi-day workshops open to all scientists. Clinical and basic researchers spend intense days sharing data and planning new collaborations for progress towards treatments and cure.
- > Various NIH Institutes have funded all international workshops through R13 and other granting mechanisms
- > Other organizations have also generously sponsored workshops

The Max and Victoria Dreyfus Foundation, Inc.

american federation for aging research

Jack & Pauline Freeman Foundation, Inc.

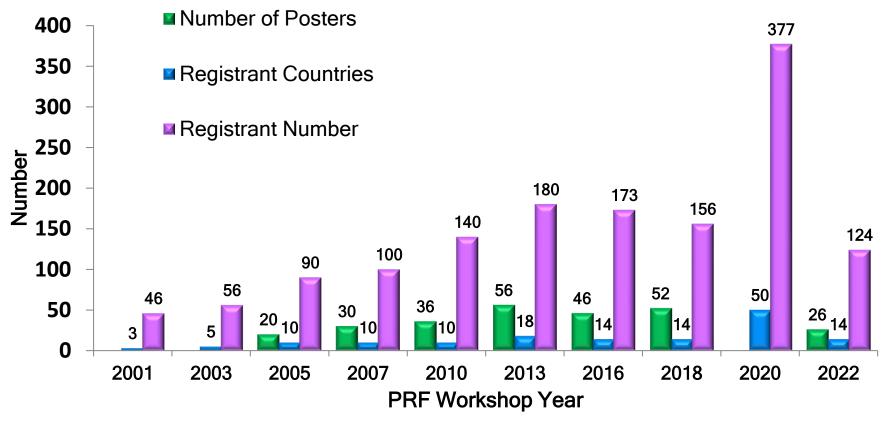

Growth of Global Interest In PRF Workshops

^{* 2020} was a webinar. Posters N/A

Subspecialty Scientific Meetings

Small, focused meetings designed to promote and support work in areas of high interest for Progeria

First Genetics Consortium Meeting - "Searching for the Progeria Gene", August 23, 2002, Brown University, Providence, RI

Second Genetics Consortium Meeting - "Post-gene Discovery", July 30, 2003, Bethesda, MD

Bone Marrow Transplant Meeting - "Forging Ahead by Exploring Potential Treatments", April 25-26, 2004, National Institutes of Health, Bethesda, MD

New Frontiers in Progeria Research (2012), Boston, MA

The first "Progeria Aortic Stenosis Intervention Summit", May 2, 2023, Virtual by Zoom

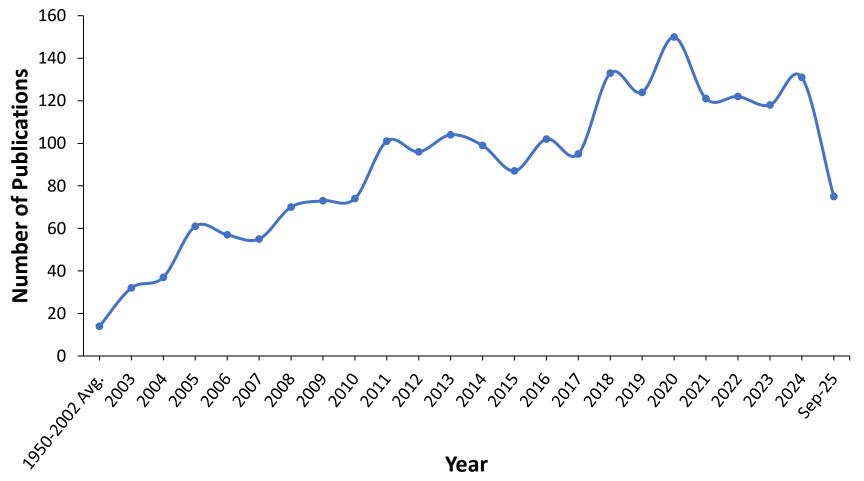

Scientific Publications

As of September 18, 2025:

- Scientific articles have been published citing The Progeria Research Foundation Grants Funding Program
- Scientific articles have been published citing PRF Cell & Tissue Bank resources:
 - Publication list at https://www.progeriaresearch.org/prf-cell-and-tissue-bank-publications/
- 36 Scientific articles have been published citing The PRF Medical & Research Database:
 - Publication list at www.progeriaresearch.org/medical-database/
- 31 Scientific articles have been published from clinical trial data
 - See slide #54 and #55
- 4 Scientific articles have been published concerning PRF Scientific Workshops

Progeria Related Publications

Today over 100 publications on Progeria per year are published in well known and peer-reviewed scientific journals read by researchers worldwide.

Progeria Clinical Care Handbook

The Progeria Handbook 2nd Edition. A Guide for Families & Health Care Providers of Children with Progeria. *The Progeria Research Foundation.* Leslie B. Gordon MD, PhD; Medical Director (editor) 2019.

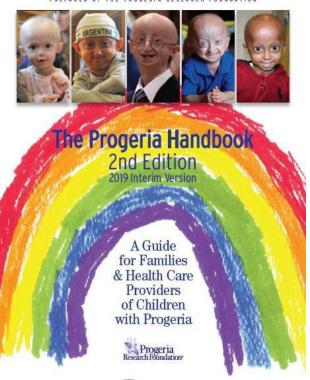

Provided in Chinese, English, Italian, Japanese, Portuguese and Spanish

Expert contributors from Boston Children's Hospital

Number of Progeria Care Handbooks distributed to families of those with Progeria and their care givers:
